## **FEATURED PRESENTATION:**

*Dr. John Nosti TMD - Restorative Connection;*

*Have your TMD patients requested cosmetic treatment that you were afraid to deliver? Your TMD patients are not always condemned to lifelong splint wear. Dr. Nosti uses past cases to teach you when and how to take your patients to the restorative phase of dentistry while maintaining the benefits of your splint therapy. His expertise in transferring a successful TMD patient into a restorative patient will be demonstrated with several case studies of his own patients' transformations.*
